

MISTA 2005

Proceedings of the

2nd Multidisciplinary International Conference on Scheduling: Theory and Applications

18th – 21st July 2005
New York, USA

Edited by

Graham Kendall, University of Nottingham, UK

Lei Lei, Rutgers University, USA

Michael Pinedo, New York University, USA

Published by Stern School of Business, New York University, USA

ISSN 2305-249X

ISBN-10: 0-9545821-4-4

ISBN-13: 978-0-9545821-4-2

Contents

Plenary Speakers

Good Neighborhoods and Well-Matched Neighborhoods	
<i>Balas E.</i>	2
Seamless Download Scheduling in Computer Networks	
<i>Coffman E.</i>	3
Scheduling, a Critical Biography	
<i>Lenstra J. K.</i>	4

Tutorial Speakers

Shop Scheduling with Blocking	
<i>Brucker P.</i>	6
Stochastic Scheduling Subject to Preemptive-Repeat Machine Breakdowns	
<i>Cai X.</i>	6
Hybrid Technologies for Supply Chain Planning and Scheduling	
<i>Vazacopoulos A.</i>	6
Constraint Satisfaction	
<i>Tsang E.</i>	6
Supply Chain Scheduling	
<i>Hall N.</i>	6
Scheduling in Uncertain and Dynamic Environments	
<i>Smith S.</i>	6

Alternative Formulations: Abstracts

A TSP Formulation of the DNA Sequencing Problem	
<i>Nikolakopoulos A. and Sarimveis H.</i>	8
Multi-Criteria Soft Constraints in Timetabling	
<i>Rudova H. and Vlk M.</i>	11
Models for Adjacent Resource Scheduling	
<i>Duin C.W. and van der Sluis H.J.</i>	16

Applications: Papers

Scheduling Multiple Types of Time-Shared Aircraft: Models and Methods for Practice	
<i>Karaesmen I. Z., Keskinocak P., Tayur S. and Yang W.</i>	19

Applications: Abstracts

Systems Design for Scheduling—Open Tools	
<i>De Causmaecker P., Demeester P., VandenBerghe G. and Verbeke B.</i>	40
A Deterministic Scheduling Approach for Wafer Fabrication Facilities	
<i>Mason S. J., Pfund M. and Fowler J.</i>	42
Multiple Orders Per Job Scheduling Problems	
<i>Fowler J., Kutanoglu E. and Mason S.</i>	44
Optimal Reactive Scheduling for Job Shop, Make-to-order Industries: A Mould Making Industry Case Study	
<i>Gomes M. C., Barbosa-Povoa A. and Novais A. Q.</i>	46

Batch Scheduling: Papers

Multiple Orders Per Job Batch Scheduling on a Single Machine with Incompatible Jobs <i>Erramilli V. and Mason S. J.</i>	48
--	----

Batch Scheduling: Abstracts

A Decomposition Approach for Batch Scheduling in the Processing Industry <i>Maravelias C. T.</i>	66
---	----

Delivery Scheduling: Abstracts

How to Maximize Rewards in an Incentived Made-to-order Scheduling Environment <i>Glass C. A. and Ng D. S.T.</i>	69
On the Capacitated Packing-Delivering Problem with a Fixed Route <i>Lei L., Park S. and Liu S.</i>	70

Evolutionary Algorithms: Abstracts

Ant Colony Optimisation for Power Plant Maintenance Scheduling Optimization: A Simplified Hydro Tasmania System <i>Foong W., Maier H. R. and Simpson A. R.</i>	72
---	----

Job-shop Scheduling: Papers

An Approach to Predictive-reactive Scheduling of Parallel Machines Subject to Disruptions <i>Duenas A. and Petrovic D.</i>	74
---	----

Job-shop Scheduling: Abstracts

Approximate Solutions for a New Version of the Car Sequencing Problem <i>Adenso-Diaz B., Bautista J. and Pereira J.</i>	93
--	----

Local Search: Papers

Random Walks and Neighbourhood Bias in Oversubscribed Scheduling <i>Roberts M., Whitley L. D., Howe A. E. and Barbulescu L.</i>	98
--	----

Local Search: Abstracts

Tabu Search Algorithms For Cyclic Machine Scheduling Problems with Blocking <i>Brucker P. and Kampmeyer T.</i>	107
Repair-cost-guided Local Search for Scheduling <i>Laplagne I., Kwan R. S. K. and Kwan A. S. K.</i>	109

Machine Scheduling: Papers

Bicriteria Scheduling of Equal Length Jobs with Release Dates on Identical Parallel Machines <i>Balasubramanian H., Fowler J. and Keha A.</i>	112
Enumeration of Pareto Optima for Uniform Parallel Machine Scheduling with Two Criteria <i>Bouibede-Hocine K. and T'kindt V.</i>	123
Heuristic Approaches to a Common Due Date Earliness-tardiness Scheduling Problem <i>Gordon V. S. and Tarasevich A. A.</i>	132
The Single Machine Just-in-time Scheduling Problem with Preemptions <i>Hendel Y. and Sourd F.</i>	140

The Single-machine Earliness-tardiness Scheduling Problem with Due Date Assignment and Resource-dependent Processing Times <i>Steiner G. and Shabtay D.</i>	149
A Branch-and-bound Algorithm for Single Machine Total Tardiness Problem with Release Dates <i>Oguz C. and Yucel E.</i>	162
Large Neighborhood for a Parallel Scheduling Problem with Earliness-tardiness Penalties and a Common Due Date <i>Rios Solis Y. A. and Sourd F.</i>	169

Machine Scheduling: Abstracts

A Divide-and-merge Algorithm for Single Machine Weighted Tardiness Problem <i>Keha A. and Fowler J.</i>	186
Job Shop Scheduling with Earliness, Tardiness and Intermediate Inventory Holding Costs <i>Bulbul K.</i>	188
Scheduling a Single Machine to Minimize a Regular Objective Function under Setup Constraints <i>Pape C. L. and Baptiste P.</i>	193
Efficient Algorithms for Machine Scheduling Problems with Earliness and Tardiness Penalties <i>Feng G. and Lau H. C.</i>	196
Stable Single-machine Schedules <i>Leus R. and Herroelen W.</i>	213
Lower Bounds for Parallel Machine Scheduling <i>Savourey D., Jouglet A. and Baptiste P.</i>	215
Job Shop Scheduling Problem with Multi-purpose Machines and Availability Constraints <i>Zribi N., Kamel A. E. and Borne P.</i>	217
Complexity Results for the Parallel Machine Scheduling Problems with a Server in Computer Systems <i>Guirchoun S., Souhkal A. and Martineau P.</i>	232

Multi-processor Scheduling: Papers

A Service Level Agreement Protocol and Tabu Search for Scheduling on Computational Grids <i>Ouelhadj D., Garibaldi J.M. and Sakellariou R.</i>	238
How Good are SPT Schedules for Fair Optimality Criteria <i>Angel E., Bampis E. and Pascual F.</i>	244
A Heuristic Algorithm for Scheduling ‘Blocked Out’ Units in Continuous Processing Industry: Preliminary Results <i>Bose S. K. and Bhattacharya S.</i>	258

Production Scheduling: Papers

A Bi-criteria Approach to Scheduling Wafer Fabrication Facilities <i>Pfund M., Balasubramanian H., Fowler J. and Mason S.</i>	276
Minimizing Makespan with Multiple Orders Per Job in a Two Machine Flowshop with Item Processing <i>Laub J. D., Fowler J. W., and Keha A.</i>	288
A Sequential Pair Exchange Approach for Solving Single-machine Scheduling Problems with General Earliness-tardiness Penalties <i>Lin S-W. and Chou S-Y.</i>	299

Production Scheduling: Abstracts

Lower and Upper Bounds for the Job-shop Scheduling Problem with Sequence-dependent Setup Times <i>Artigues C., Buscaylet F. and Feillet D.</i>	316
Proactive Resource Allocation Heuristics for Robust Project Scheduling <i>Braeckmans K., Demeulemeester E. and Herroelen W.</i>	322
Optimal Production Scheduling for Dairy Industries <i>Doganis P., Sarimveis H., Alexandridis A. and Patrinos P.</i>	324
Approximations to Optimal k -unit Cycles for Dual Gipper Robot Cells <i>Geismar H. N., Dawande M. and Sriskandaranjah C.</i>	326
The Unit-Operation-Stock Superstructure (UOSS) and the Quality-Logic-Quality Paradigm (QLQP) for Production Scheduling in the Process Industries <i>Kelly J. D.</i>	327
Forming and Scheduling Jobs with Order Weights in Semiconductor Manufacturing <i>Tanrisever F. and Kutanoglu E.</i>	334
A Tabu-Search Based Reactive Procedure for the RCPSP with Stochastic Resource Availabilities <i>Lambrechts O., Demeulemeester E. and Herroelen W.</i>	335
A Survey on Minimizing Makespan for the Preemptive job shop with Two Machines <i>Kimbrel T.</i>	337
Single Machine Product Scheduling with Outsourcing Allowed <i>Sung C. S., Lee I. S., Yoon S. H. and Juhn J.H.</i>	340
An Evaluation of Exact and Suboptimal Procedures for Constructing Stable Project Schedules <i>Van de Vonder S., Demeulemeester E. and Herroelen W.</i>	341

Real-time Scheduling: Papers

Periodic Real-time Scheduling: From Latency-based Model to Deadline-based Model <i>Cucu L. and Sorel Y.</i>	344
A Comparison of Combinatorial Optimization and Dispatch Rules for Online Scheduling <i>Montana D.</i>	353

Real World Scheduling: Papers

Job Shop Scheduling with Lot-sizing and Batching in an Uncertain Real-world Environment <i>Petrovic S., Fayad C. and Petrovic D.</i>	363
A History of Decision-Making Tools for Production Scheduling <i>Herrmann J. W.</i>	380

Real World Scheduling: Abstracts

Challenges in Matching Assets with Demand across All Supply Chain Management Decision Tiers in the IBM Microelectronics Division from Automation Fabs to Central Planning Engines to Collaborative Behavior (Work Around) <i>Fordyce K., Burda R., Degbotse A., Milne J., Morrison J. R. and Williamson E.</i>	391
Scheduling Wafer Fabrication Operations: State-of-the-practice and Future Needs <i>Fowler J. and Pfund M.</i>	392
Scheduling Product Families in a High Volume, Flexible, Assemble-to-order Factory <i>Monkman S. K., Morrice D. J. and Bard J. F.</i>	394

Rostering: Papers

A Decomposition, Construction and Post-processing Approach for Nurse Rostering <i>Brucker P., Qu R., Burke E. and Post G.</i>	397
--	-----

Rostering: Abstracts

Integrating Nurse and Surgery Scheduling <i>Beliën J. and Demeulemeester E.</i>	408
An Electromagnetic Meta-heuristic for the Nurse Scheduling Problem <i>Maenhout B. and Vanhoucke M.</i>	410

Search Algorithms: Papers

An Investigation of Variable Neighbourhood Search for the University Course Timetabling <i>Abdullah S., Burke E. K. and McCollum B.</i>	413
A Zero-Inventory Production-Distribution Problem with Time-Window Constraints <i>Armstrong R., Lei L. and Gao S.</i>	428
Scheduling UET-UCT Task Systems under the Out-forest Precedence Constraints <i>Hanen C. and Zinder Y.</i>	445
The Worst-case Analysis of the Garey-Johnson Algorithm for Preemptive Tasks on m Processors <i>Hanen C. and Zinder Y.</i>	453
Scheduling Orders in Dedicated and Flexible Machine Environments <i>Leung J. Y. T., Li H. and Pinedo M.</i>	471
Retractable Contract Network for Distributed Scheduling <i>Tsang E. P. K., Gosling T., Virginas B., Voudouris C. and Owusu G.</i>	485
Scheduling Algorithms for Master-slave Systems <i>Leung J. Y. T. and Zhao H.</i>	501

Search Algorithms: Abstracts

Skills-Based Agent Scheduling at Call Centers <i>Aykin T. and McKenna J. S.</i>	515
Timetable Synchronization for Mass Transit <i>Leung J. M. Y. and Wong R. C. W.</i>	516
Algorithms for Online Buffer Management <i>Mahdian M., Bansal N., Fleischer L. K., Kimbrel T., Schieber B. and Sviridenko M.</i>	518
A Practitioner's Approach to Distribution and Supply Chain Planning and Management <i>Miller T.</i>	519
Job Shop Scheduling with Set-up Times, Deadlines and Precedence Constraints <i>Balas E., Simonetti N. and Vazacopoulos A.</i>	520
Worst-case Analysis for Queueing Service Policies <i>Wang Z. and Xing W.</i>	533
Integrated Scheduling of Different Types of Handling Equipment at Automated Container Terminals <i>Lau H. Y. K., Zhao Y. and Pan C.</i>	536

Supply Chain Scheduling: Papers

Single Machine Multiple Orders Per Job Scheduling Using Column Generation <i>Jampani J., Mason S. J. and Erramilli V.</i>	539
--	-----

Supply Chain Scheduling: Abstracts

Integrated Production-distribution Scheduling to Optimize the Tradeoff between Order Delivery Performance and Total Cost <i>Pundoor G. and Chen Z-L.</i>	549
Combined Production and Distribution Scheduling of Ready-mix Concrete <i>Fong P. Y. and Piplani R.</i>	551
Incremental Propagation Rules for a Precedence Graph with Optional Activities and Time Windows <i>Bartak R. and Cepek O.</i>	552

Theoretical Scheduling: Papers

Scheduling on a Single Machine to Minimize Total Flow Time with Job Rejections <i>Bunde D. P.</i>	562
Online Scheduling of Precedence Constrained Tasks <i>Huo Y. and Leung J. Y-T.</i>	573
Bicriteria Parallel Task Scheduling <i>Baille F., Bampis E., Laforest C. and Rapine C.</i>	585
On Project Scheduling with And/or Precedence Constraints <i>Adelson-Velsky G., Gelbukh A. and Levner E.</i>	597
New Tight NP-hardness of Preemptive Multiprocessor and Open Shop Scheduling <i>Shchepin E. and Vakhania N.</i>	606
Single-machine Scheduling with General Costs under Compound-type Distributions <i>Cai X., Wu X. and Zhou X.</i>	630
A Comparison of Different Formulations for the Non-preemptive Single Machine Total Weighted Tardiness Scheduling Problem <i>Khowala K., Keha A., and Fowler J.</i>	643

Theoretical Scheduling: Abstracts

On the Complexity of Adjacent Resource Scheduling <i>Duin C. and van der Sluis H. J.</i>	653
Improved Approximation Algorithms for Broadcast Scheduling <i>Bansal N., Coppersmith D. and Sviridenko M.</i>	655

Timetabling: Papers

Graphical Tools for Heuristic Visualization <i>Ranson D. and Cheng P. C-H.</i>	658
---	-----

Timetabling: Abstracts

Course Timetabling—Extended Tiles for University Timetabling <i>Adriaen M., De Causmaecker P. and VandenBerghe G.</i>	669
A Predictive-reactive Approach for RCPSP with Labour Constraints and Time-dependent Activities Requirements <i>Drezet L-E. and Billaut J-C.</i>	671
Solving a Timetabling Problem using Bender's Decomposition <i>Sarin S. C., Wang Y. and Varadarajan A.</i>	673

Transport Scheduling: Papers

Applying the Extended Network Simplex Algorithm to Dynamic Automated Guided Vehicles Scheduling <i>Rashidi H. and Tsang E. P.K.</i>	677
--	-----

Transport Scheduling: Abstracts

On a Certain Berth Scheduling Problem <i>Blazewicz J., Machowiak M., Cheng T.C. E. and Oguz C.</i>	694
Forecasting Flight Schedule Robustness <i>Burke E., DeCausmaecker P. , DeMaere G., Mulder J. and Paelinck M.</i>	698
Scheduling the Production and Transportation Operations subject to Dynamic Arrivals <i>Fan C., Kumar M., Lei L. and Yang J.</i>	701
Building Robustness into Train Driver Schedules <i>Kwan A. S.K., Laplagne I. and Kwan R. S.K.</i>	702

Vehicle Routing: Papers

Improved Pruning in Column Generation of a Vehicle Routing Problem <i>Westphal S. and Krumke S. O.</i>	705
---	-----

Vehicle Routing: Abstracts

Vehicle Routing and Scheduling with Time Varying Travel Times <i>Eglese R. and Maden W.</i>	724
A Dynamic Programming Approach to the Truckload Routing Problem using A Triplet Formulation <i>Miori V. M.</i>	725

New Trends in Scheduling: Abstracts

Inventory Control and Scheduling with Facilities in Parallel <i>Krasik V., Leung J., Pinedo M. and Zhang J.</i>	740
--	-----

Others: Abstracts

Analytic Evaluation of the Expectation and Variance of Different Performance Measures for Scheduling Jobs on a Single Machine under Processing Time Variability <i>Sarin S. and Nagarajan B.</i>	744
A Genetic Algorithm with Random Keys Approach for the Job Shop Scheduling Problem with Earliness and Tardiness <i>Bedoya-Valencia L., Rodriguez-Velázquez E. and Rabadi G.</i>	745
